More Pick Standards 1.1

We evaluate products included in our Picks standards primarily from the perspective of practical value. While we strive to **quantify criteria** wherever possible to derive reliable ratings, certain non-quantifiable standards may still exist within the evaluation framework. These criteria may influence scores to varying degrees but do not undermine the overall reference value of the ratings. *Please note that scores are for reference only—your actual usage experience remains the ultimate benchmark.*

Here are detailed standards for key categories (more new category standards are continuously being developed):

Home Furnishings Category

- **Bedding**: Fabric material, breathability, skin-friendliness, color fastness, shrinkage rate after washing, durability
- **Kitchenware**: Material safety, thermal conductivity (for cookware), corrosion resistance, ease of cleaning, ergonomic design, service life
- **Furniture**: Wood/material environmental protection grade, structural stability, load-bearing capacity, surface treatment (scratch/wear resistance), dimensional rationality, formaldehyde emission level

Household Cleaning Category

- **Clothing Cleaning**: Cleaning power, ease of use, consumption (for 10 T-shirts), scent strength
- **Facial & Body Cleansing**: Cleansing efficacy, irritation level, scent intensity
- **Kitchen & Bathroom Cleaning**: Sterilization rate, pipe friendliness, ease of use

- **Home Surface Cleaning**: Cleaning power, safety, volatility

Digital Accessories Category

- **Phone Cases**: Protection level (shockproof/scratch-resistant), material texture, precise hole positioning, wireless charging compatibility, aesthetic design

- **Headphones**: Sound quality restoration, noise reduction effect, wearing comfort, battery life, Bluetooth connection stability, dust/water resistance rating

- **Power Banks**: Consistency between actual capacity & labeled capacity, charging speed, compatibility, weight/portability, overcharge/overdischarge protection

- **Batteries**: Drop test resistance, longevity, compatibility, overcharge/discharge safety (rechargeable), environmental friendliness

Maternity and Infant Products Category

- **Infant Milk Powder**: Nutrient compliance rate, milk source safety, dissolvability in brewing, absence of added flavors/sucrose, product traceability

- **Baby Diapers**: Absorption speed, water locking capacity, breathability, waist elasticity, material softness, anti-leakage design

- **Children's Toys**: Environmentally non-toxic materials, rounded edges without burrs, part fastness (prevent choking hazards), educational functions, age-appropriateness

Beauty and Skincare Category

- **Color Cosmetics**: Pigmentation intensity, longevity, water/sweat resistance, ingredient safety, makeup adherence, packaging tightness

- **Skin Care Products**: Active ingredient content, absorption speed, moisturizing/oil-control effect, non-comedogenic/non-irritating properties, suitable skin type range, shelf life

Food Category

- **Snacks**: Ingredient sources, additive usage, taste/flavor, packaging tightness, production date/shelf life, price-performance ratio

- **Grain and Oil Products**: Nutrient content, processing technology, impurity level, storage stability, origin traceability, packaging portability

- **Pet Food**: Nutritional balance, ingredient safety, palatability, processing technology & freshness

- **Drinks**: Ingredient safety, taste/flavor, suggested serving size (for sugary drinks), packaging value

Sports and Outdoor Category

- **Sports Shoes**: Cushioning performance, grip, breathability, wrapping support, upper wear resistance, weight

- **Outdoor Tents**: Waterproof rating, wind resistance, ease of setup, space utilization, material tear resistance, storage volume

Tool Category

- **Hardware Tools**: Material, durability, precision, safety, ease of use, craftsmanship details

Feedback Welcome: If you have suggestions for improving our selection criteria, please feel free to send them to us. We are constantly developing new category standards to enhance our evaluation system!
